

# VERIFONE P900 PRINTER

**There's one correct answer to the strictest printing performance demands—the PRINTER 900.**

Positioned at the top of the VeriFone line, the PRINTER 900 is fast, reliable and compatible with VeriFone-developed PRINTER 200 and 250 text applications.

As a premium roll printer that can increase merchant productivity, the PRINTER 900 earns the highest marks.

**Swifter Transactions**

The PRINTER 900 has significantly reduced average transaction time, and there are several reasons why. Its raw print speed is a swift 3.7 lines per second. It has a separate motor for paper advance, plus a print head that prints in both directions for increased efficiency. And it features a three-line buffer that allows printing to continue while the terminal is processing.

**An A+ in Reliability & Compatibility**

The PRINTER 900 has a print head life of 100 million characters, a significant performance breakthrough. The overall mechanism has a reliability measure of 2.5 million lines. These factors ensure that the PRINTER 900 provides years of reliable performance.

**Extra Credit for User-Friendliness**

The PRINTER 900 has a number of features that make it remarkably easy to operate and maintain. For example, integrated paper roll support arms help keep the paper in place without need of a spindle, an item that is frequently misplaced.

Automatic paper feeding ensures trouble-free loading. And a high-yield ribbon, developed exclusively by VeriFone, has a life of 2.0 million characters—to minimize the cost of ownership. Additionally, paper-low/paper-out sensors inform you of the status of your paper supply.

**The highest marks for speed and reliability. VeriFone's top-of-the-line roll printer is in a class by itself.**

As a premium roll printer that can increase merchant productivity, the Printer 900 earns the highest marks. This roll printer is in a class by itself, meeting the highest print performance standards.

It also offers a convenient migration path, allowing merchants to move from the Printer 220 or Printer 250 to the Printer 900 with only minor adjustments to their payment applications.

Meeting all of your point-of-sale needs!

**SETTING THE STANDARD FOR QUALITY**
